

Gree Sticker Remover

S -126

Product Description

Gree sticker remover is composed of aerosol can, aerosol valve, paint solution and propellant. This product uses mild remove formula, can effectively dissolve the surface colloid of the removed object, do not corrode the surface of the object, spray and wipe just once, easy to remove.

Product Features & Application

- Easy to remove
- Car care and household
- Not to hurt the object
- Environmental protection formula

→ It is widely used in the repair of templates, aluminium plastic panels, metal, ceramics, glass, automotive paint and some rubber, such as transparent adhesive removal.

Instruction & Usage

- Shake well before use, keep the bottle body upright and spray evenly at 15cm from the surface.
- The cleaning part should be sprayed to cover when the glue is removed, and the size and thickness of the residual gum will determine the amount of the product.
- After spraying the product, wait for a moment, so that the liquid is fully immersed in the colloid and then combined with cotton scraper or suitable tools to achieve the best adhesive remover effect.
- It dissolves the glue, the barrier materials such as paper and plastic film on the surface of the film should be cleaned out first, so as to prevent the liquid from contacting the colloid to achieve the effect of removing glue.
- When the remaining small amount of liquid can not be ejected, please rotate the nozzle 180° and spray again.

Ending Work

If not finished, the remaining materials should be kept at room temperature to avoid exposure to fire sources.

Technical Specification

Parameter	Unit	At 25°C and 60% relative humidity
Liquid appearance	---	Colorless transparent liquid
Smell	---	Comply with the regulations
Rate of spray	%	≥97
Internal pressure, 50°C	MPa	≤1.0
Density (20°C)	g/cm ³	0.73-0.83
